

ABSTRACT

5 A composite dielectric material comprising a resin
resulting from a polyvinylbenzyl ether compound and a
dielectric ceramic powder dispersed therein is useful in
the high-frequency region. A composite magnetic material
comprising a polyvinylbenzyl ether compound and a magnetic
10 powder is also provided as well as a flame retardant
material comprising a polyvinylbenzyl ether compound and a
flame retardant. These materials may be used in the
fabrication of substrates, prepreg sheets, coated metal
foils, molded items, and metal foil-clad substrates.
